ATLANTIC ACTION PLAN

KIMERAA Knowledge Transfer to Improve Marine Economy in Regions from the Atlantic Area

KNOWLEDGE TRANSFER TO IMPROVE MARINE ECONOMY IN REGIONS FROM THE ATLANTIC AREA

ATLANTIC AREA
Transnational Programme
INVESTING IN OUR COMMON FUTURE

The sea is a strategic resource for all territories along the Atlantic coast, where the most successful economic activities are related to using their marine resources effectively.

Building up on this approach KIMERAA aimed to develop niches of excellence by linking companies to scientific knowledge, connecting institutional actors involved in the Marine Economy and deepening the understanding of maritime clusters, innovation actors and institutions in the Atlantic regions. By elaborating information and analysis tools, cooperation synergies between research institutions and industries, and mechanisms for knowledge transfer, KIMERAA made a decisive contribution to address commonplace difficulties experienced in transforming European research into high-value and high profit products, creating spin-offs and consolidating niches of excellence linked to the Atlantic and making a significant impact on regional economic development.

Outcomes of the project

- Atlantic wide mapping of maritime clusters, sciences and innovation stakeholders.
- A catalogue of skills and services in areas connected to the sea.
- A web based information tool connecting providers and users in the maritime sector
- European Network of Knowledge Transfer in the Atlantic Area ([ENKTAA](#)).
